8. NEW BUSINESS –

a. Casella Waste Management 2022 Transport & Disposal Agreement – TK presented the draft “Agreement for Transportation & Disposal Services Between Casella Waste Management, Inc. and the ACSWMD.” This is a new contract for CY2022, with an option to extend for two more years after that. The negotiated rate for these services will be $65.08/ton. The COLA increase for each renewal year will be based upon the CPI for the Garbage & Trash collection in U.S. City for the previous year. The fuel surcharge will be based on $3.75/gallon and will be adjusted each month using the prior month’s average fuel index from EIA/Gov New England (PADD1A) index. The last bulleted paragraph of Section 2(d) (p. 2) is new, whereby the District will only be charged for any damage incurred that is confirmed to be caused by the District, beyond the usual “wear and tear” of trailers loaded with solid waste. C.Brinkman thanked TK for limiting the liability to the District.

9. DISTRICT MANAGER REPORT – TK reported on some personnel changes at the DEC, including the upcoming retirement of Cathy Jamieson, the Program Manager for the Solid Waste Program. TK also reported on the first case of COVID-19 at the Transfer Station. The VT Dept. of Health has been doing contact tracing, and those staff are in the process of getting tested. We have gone back to mandatory masking in the District office, regardless of vaccination status, and when within six feet of another person outdoors.

10. PROGRAMS REPORT – DM mentioned that he is working on producing a newsletter for issuance sometime in early to mid-December. He and Colin Clarq are also beginning early discussions about the possibility of holding another District-sponsored Repair Fair next year, likely during the month of March. The Repair Fair is a local, community-building event that encourages residents to bring broken or damaged household items such as small appliances and clothing to a location where a group of volunteer “fixers” will assess and possibly repair them. While diversion from landfill is one goal of these events, another goal is to help create a culture of repair by empowering residents to fix household items themselves. During the event, fixers are encouraged to work together with the participants to teach them new repair skills. Past Repair Fair events that were organized by the District received much positive feedback and publicity. The Hannaford Career Center in Middlebury has agreed to partner with the District again on the event and will allow use of their facility as the event venue. We will be following all required protocols for guarding against COVID-19 transmission. DM also mentioned that the newly-installed toter lifter for dumping food scraps is working well, and that he is working to procure the toter-washing system next as part of the District’s MMI Grant.
